INT-1&2 SHOULD LOOK LIKE THIS

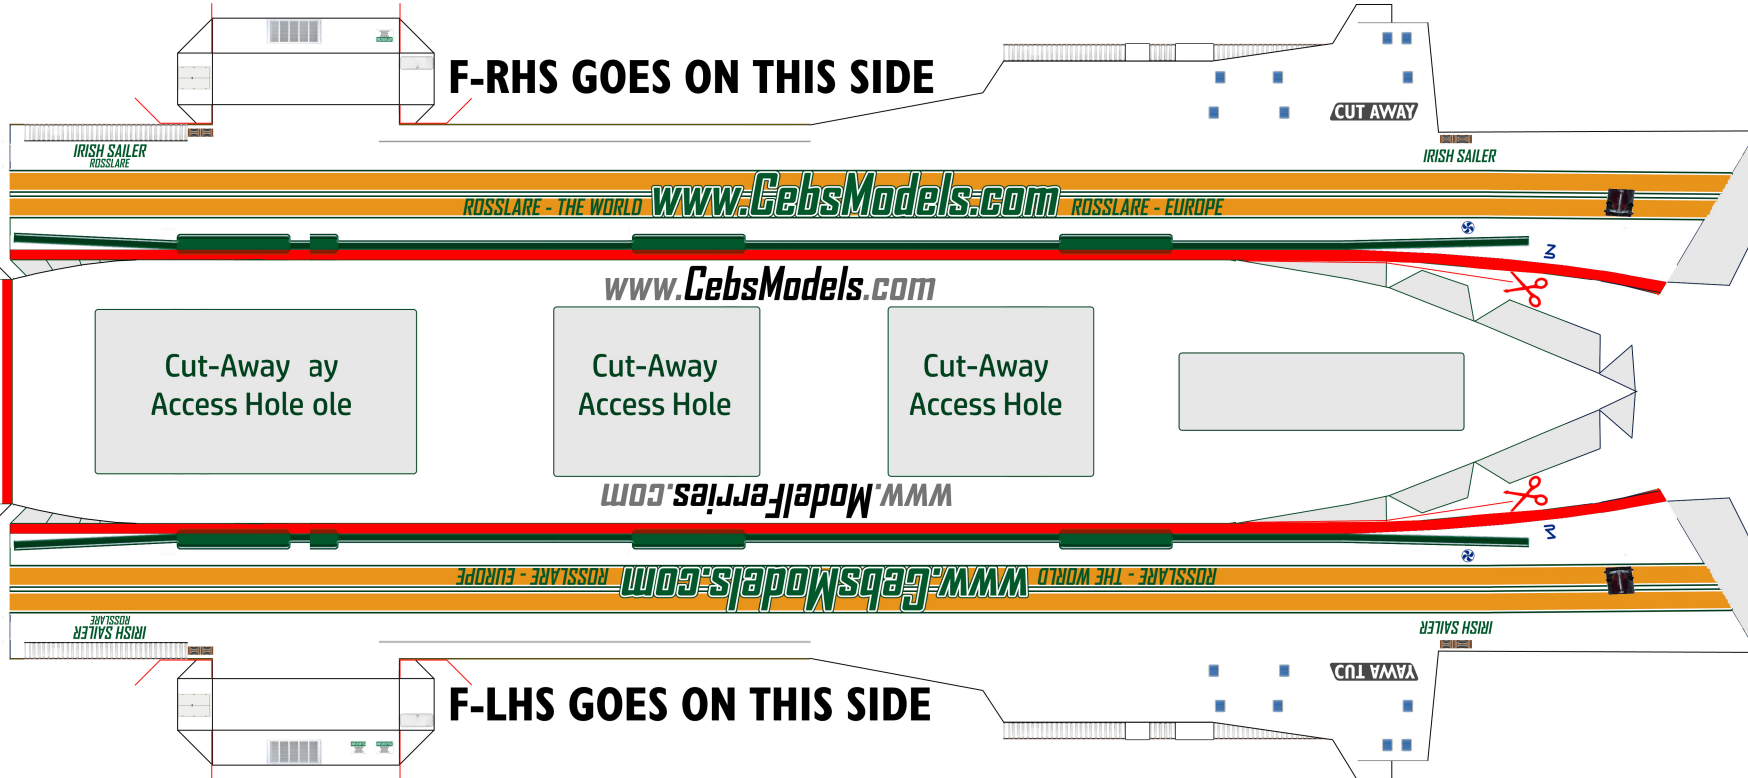

GLUE POD TO DECK FLOOR 'INT' MARK

HULL FRONT

F-RHS GOES ON THIS SIDE

Cut-Away ay Access Hole

Cut-Away Access Hole

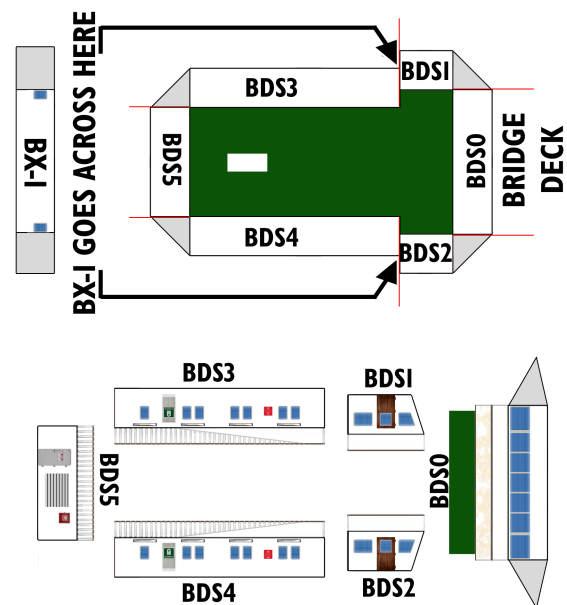

Cut-Away Access Hole

F-LHS GOES ON THIS SIDE

THIS BRIDGE GOES BETWEEN REAR TOWERS

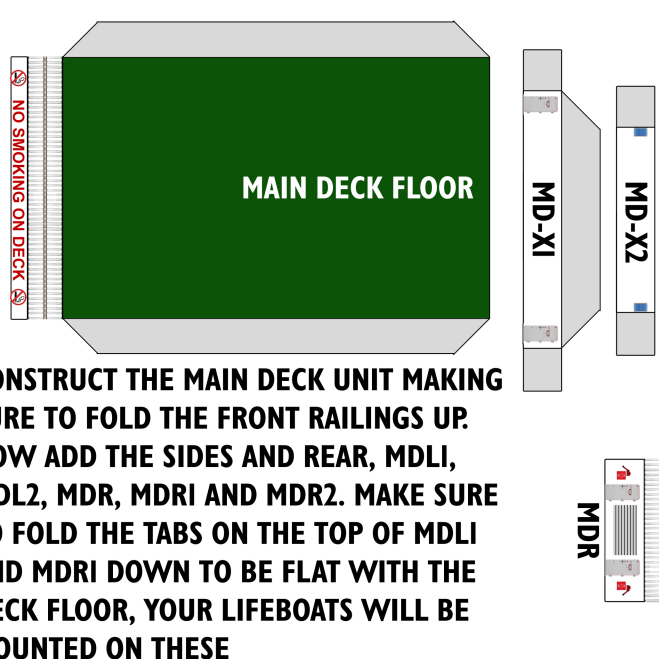

FOLD OVER AND GLUE GREY BIT

# BRIDGE

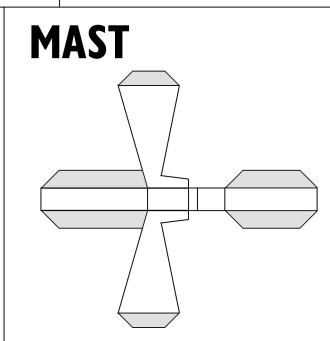

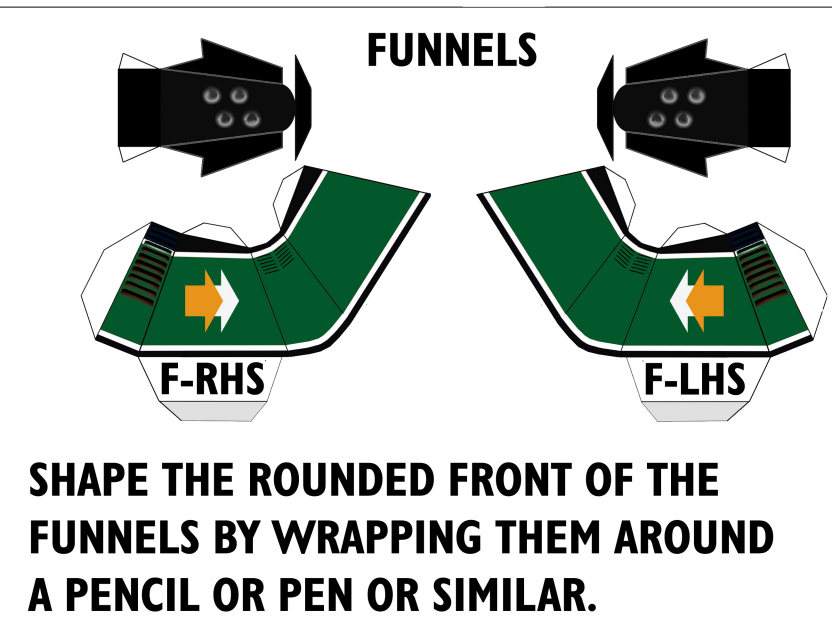

**CONSTRUCT MAIN BRIDGE DECK. NOW ADD BDS0 TO BDS1 AND BDS2 AND ADD THEM TO YOUR BRIDGE BLOCK. NOW ADD BDS3, BDS4 AND BDS5 TO THE MAIN BRIDGE BLOCK.**

# MAIN DECK

**CONSTRUCT THE MAIN DECK UNIT MAKING SURE TO FOLD THE FRONT RAILINGS UP. NOW ADD THE SIDES AND REAR, MDLI, MDL2, MDR, MDRI AND MDR2. MAKE SURE TO FOLD THE TABS ON THE TOP OF MDLI AND MDRI DOWN TO BE FLAT WITH THE DECK FLOOR, YOUR LIFEBOATS WILL BE MOUNTED ON THESE**

1. Build the bridge unit.
2. Build the main deck unit and add bridge on top.
3. Construct funnels, mast and lifeboats, add the mast and lifeboat.
4. Now cut out the main hull and construct it making sure to cut out marked areas and build the funnel bases which are part of it.
5. Cut out and add main car deck, also construct INT-1 and INT-2 too but don't add yet.
6. Add main car deck to main hull and add INT-1 & INT-2 in their marked areas, the main deck floor wants to be in line with the base of the railings on the main hull side.
7. Now add your entire main block again the floor of this will want to be in line with the base of the railings on the main hull.
8. Lastly, add your funnels making sure to put them on the correct sides.
9. Relax and enjoy the fruits of your labour.
